Floor libraries (* and bold row labels): collection or import-graph problems that block most architectures at 0%.

'n/r' = not run (e.g., OH-Sonnet covered 6 of 16 libs). 'no' = OpenHands ran but did not resolve.

'n/a' (Aider-S) = not re-validated: 5 provider-limited cells, plus jinja (its repo context exceeds the model window).

Aider/smolagents cells re-scored full-suite, correcting an earlier pytest -x truncation. See commit0/CORRECTIONS.md.
