

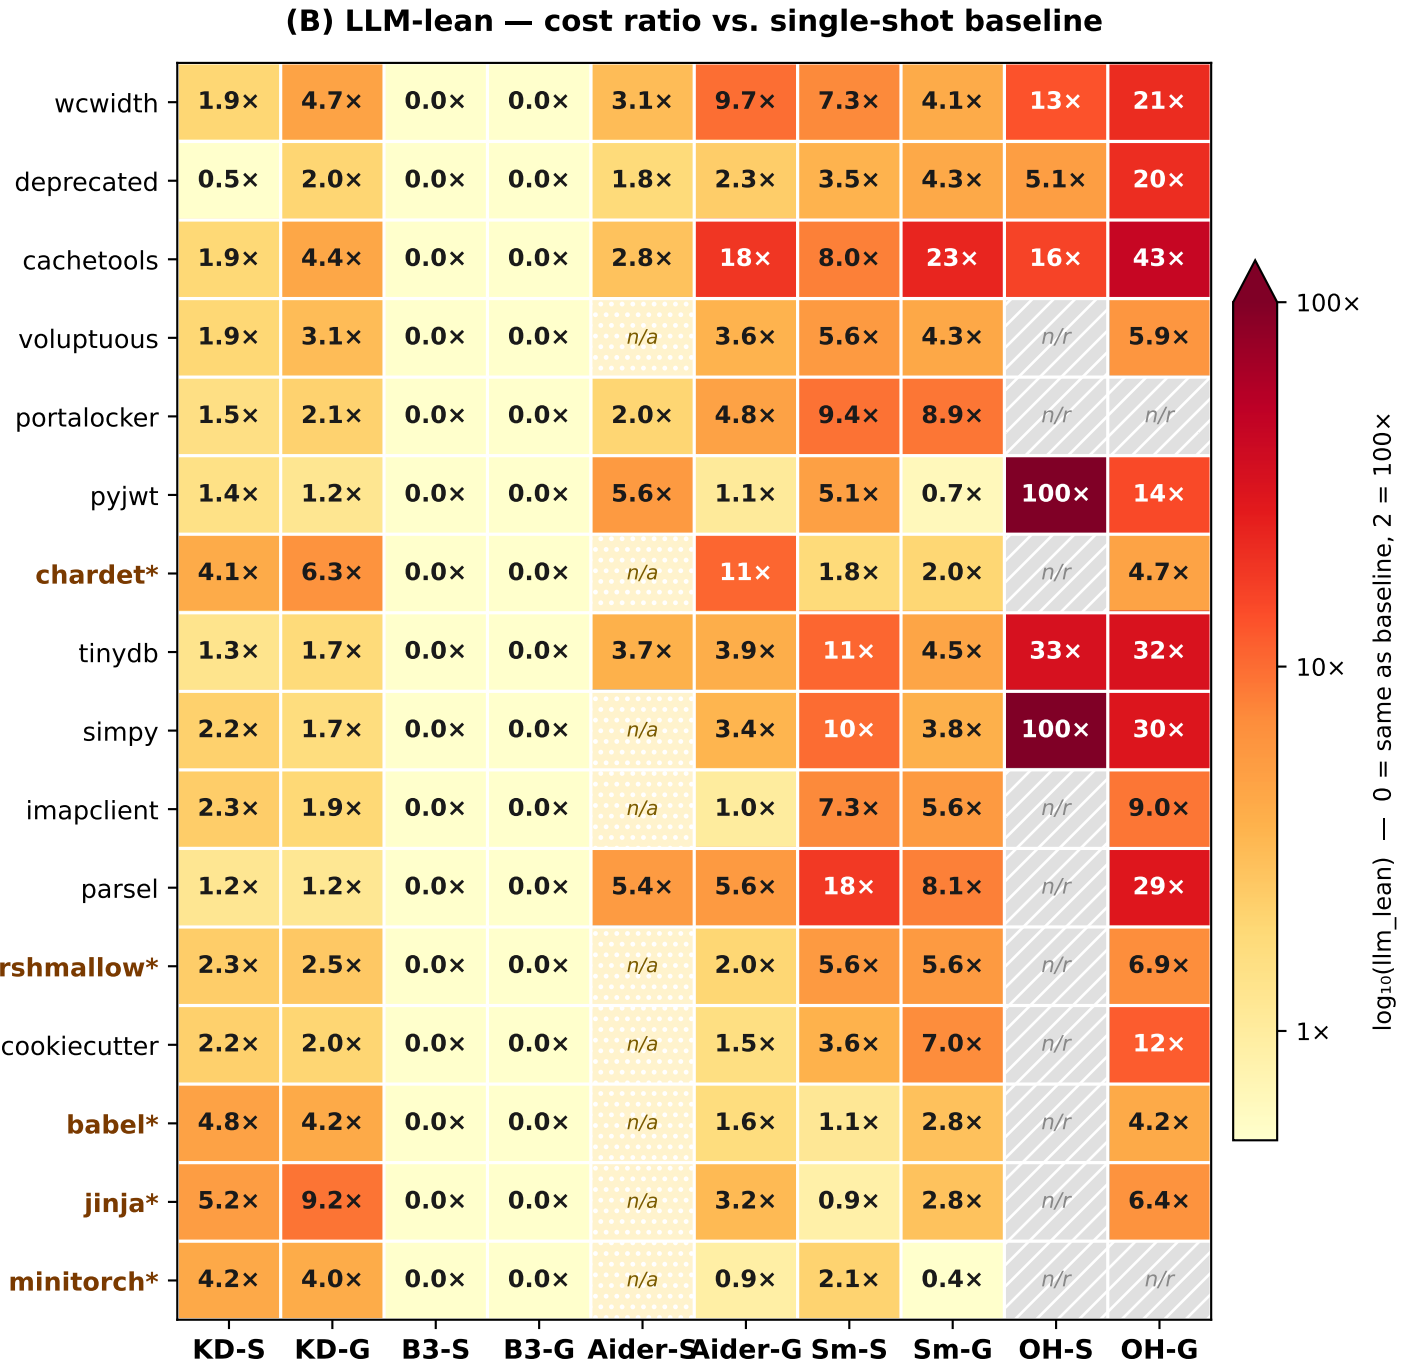

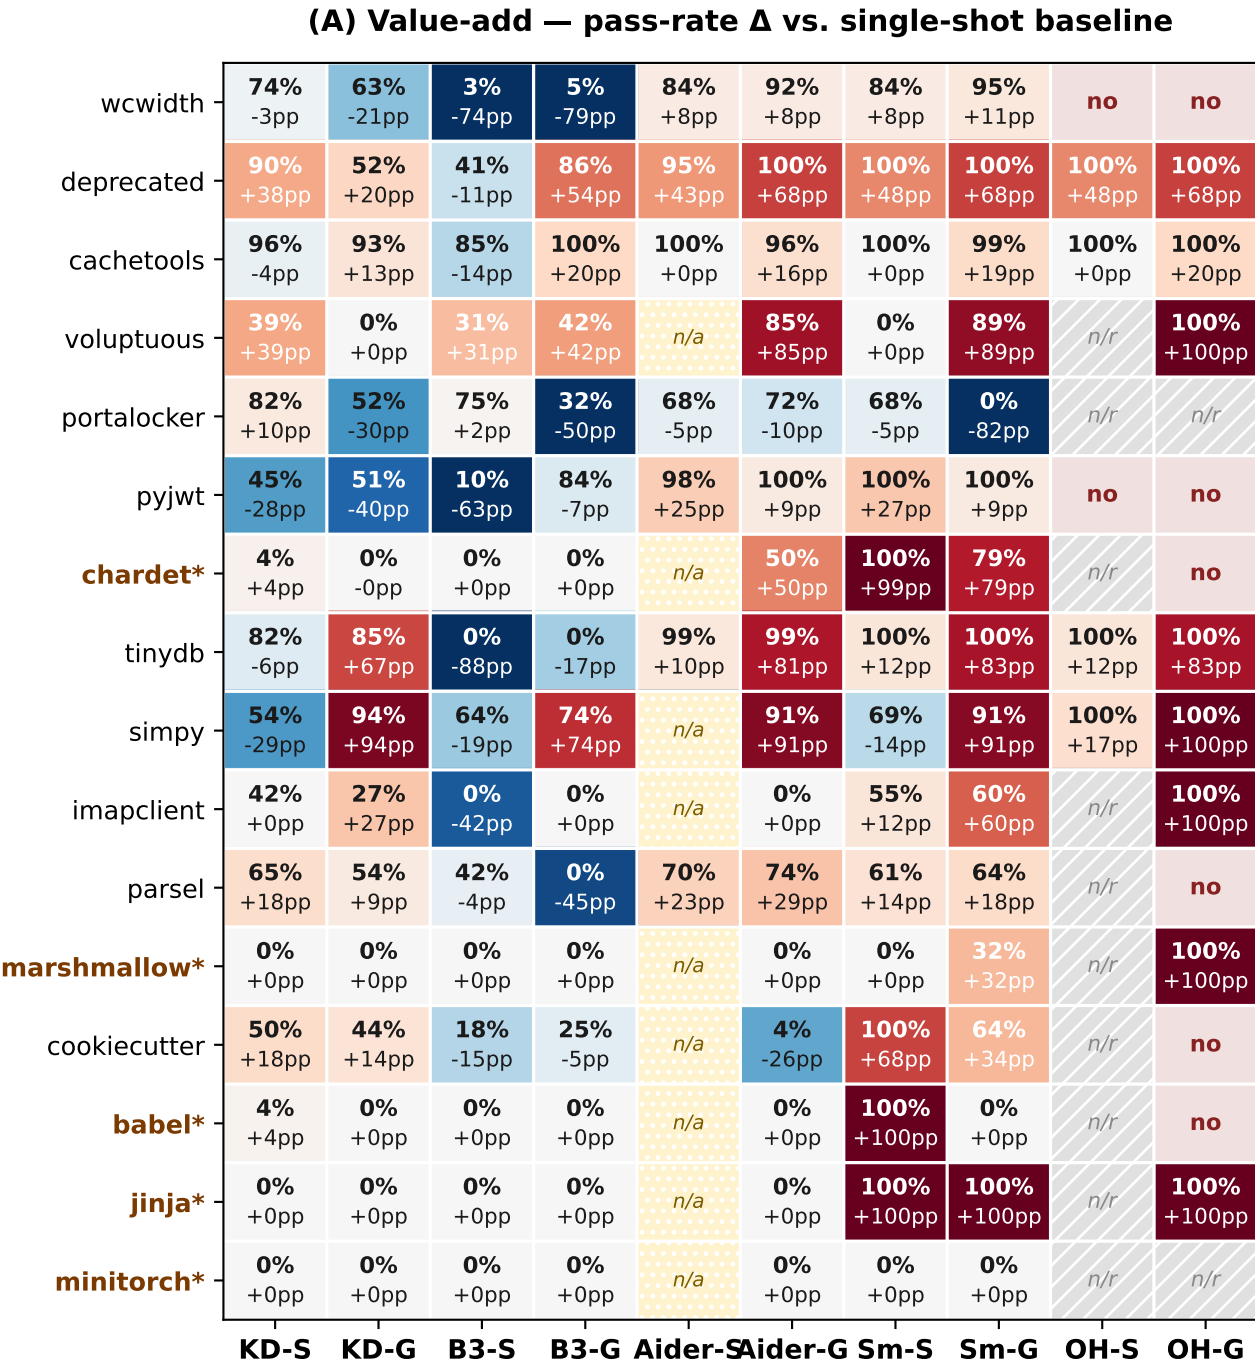

Figure 1 — Value-Add Fingerprint across (architecture × model × library) cells on commit0-lite

Floor libraries (* and bold row labels): collection or import-graph problems that block most architectures at 0%. Cells marked 'n/r' = not run (e.g., OH-Sonnet covered 6 of 16 libs). Cells marked 'no' = OpenHands ran but did not resolve. Cells marked 'n/a' = pending full-suite re-validation (Aider-S, 9 provider-limited cells). Aider/smolagents cells re-scored full-suite via commit0 test --branch (2026-06; corrects an earlier pytest -x denominator-truncation). See commit0/RE-VALIDATION.md.
